EDUCATION

New York City College of Technology

Brooklyn, NY

Bachelor of Technology in Computer Systems Technology, GPA: 3.7/4.0

Expected Graduation: May 2026

TECHNICAL SKILLS

Languages: Python, Java, C, TypeScript/JavaScript, SQL, HTML/CSS

Frameworks & Libraries: React, Next.js, TensorFlow, PyTorch, pandas, NumPy, Selenium, FinBERT

Developer Tools: Git, Docker, VS Code, Eclipse, IBM Watsonx, Capacitor, MySQL

Core Knowledge: Data Structures & Algorithms, Object-Oriented Programming, Distributed Systems, API/Web/Mobile Development, Machine Learning, Natural Language Processing, Testing & Debugging

PROJECTS

StockBot - AI Stock Trading Agent | Team Project (5 members)

2025 (Ongoing)

- Designed a trading system that reacts in real time to global events via AI pipelines and adaptively changes approach with TensorFlow reinforcement learning simulation.
- Integrated APIs and NLP models for inspection of scraped news articles and federal employee trade disclosures; analyzing sentiment likelihood, impact trust score, and other factors.
- Automatically builds/ maintains data buckets and cumulative trust scores for current stock portfolio and news outlets list; expanding towards total stock inspection and analyzing all major news sources.
- Culminates all factors in final portfolio impact calculation and trades accordingly; accuracy is inspected in retrospect and future approach is adapted via reinforcement learning engine.

NYC Small Business Violation Analyzer | 3rd Place, City Tech Datathon

2025

- Analyzed 20M+ NYC violation cases with Python, designing automated scripts for fine detection and geographic/temporal trend visualization.
- Identified \$268M in unnecessary fines, showcasing inefficiencies harming small businesses.

CUNY Compass | IBM Watsonx Hackathon Project

2025

- Built an AI-powered chatbot with Watsonx for student financial aid and academic support.
- Implemented retrieval-augmented generation with NLP + prompt engineering for accurate, context-aware responses.
- Presented to IBM mentors and engineers, with potential adoption across all CUNY colleges.

STIHL Product Scraper | Freelance Project

2025

- Developed Python + Selenium scraper for STIHL's Brazilian e-commerce site.
- Automated extraction of all product data (names, prices, specifications, images) and exported to CSV/JSON for client use.

WORK EXPERIENCE

Founding Engineer

July 2025 - Present

GeekSpeaker Inc.

New York, NY

- Designed, tested, and deployed web and mobile solutions, including SilentConvo iOS app for anonymous group therapy communication.
- Implemented end-to-end encryption, group backend logic, and UI/UX for secure mental health support.
- Collaborated with team to deliver scalable, production-ready software under startup constraints.

LEADERSHIP AND PROFESSIONAL DEVELOPMENT

- Senator of Technology and Design, City Tech Student Government Association
- Officer, Google Developer Group @ City Tech
- Chief Research Officer, Data Science and Technology Innovation Club
- Stanford DeepLearning.AI Machine Learning Specialization
- Google Machine Learning Crash Course
- Mentor Me Collective x Grow with Google IT Automation with Python course
- City Tech's Honors Scholars Program - Dean's List
